OUR OFFICE AND STORAGE FACILITIES LOCATED 1 MILE SOUTH OF ROGERS ON HIGHWAYS 71 AND 62

Where We Are . . .

We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort

Smith, Arkansas, and eighty-three miles almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Ark.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is

almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

Thirteen Reasons Why You Should Buy From Us:

**Prices Quoted
In This
Circular
Cancel All
Previous
Quotations**

- 1 Because we grow and sell you trees, plants and vines that are as good as the best that can be produced at prices far below what others will ask for the cheap inferior kind. Our nursery stock is grown by the best methods known to nurseries and no better can be produced regardless of prices. We offer \$100.00 reward for improved method on how to grow better nursery stock.
- 2 Because we prepay the postage or express charges on all orders amounting to \$10.00 or more, except Balled or Burlapped Evergreens.
- 3 Because we sell direct to the fruit growers saving you the agent's or middleman's commission.
- 4 Because we guarantee satisfaction or your money refunded, and we pay postage or express both ways.
- 5 Because we do not belong to any trust or combine, and are free to make our prices just as low as we believe we can afford.
- 6 Because all our trees and plants are guaranteed to be free from disease and insects, and have all been inspected by our State Inspector and each shipment bears a certificate of inspection.
- 7 Because we use every caution to keep all our varieties true to name and should a mistake occur and any variety prove untrue to name we will replace it free of charge or refund the price paid for it.
- 8 Because we grow and offer for sale only varieties that are known to be good fruits and money makers.
- 9 Because Benton County, Arkansas, has many, many acres of varieties of fruits, and we have under our close observation a greater variety of fruits and berries than our competitors.
- 10 Because Ozark Mountains, Arkansas, Grown Nursery Stock is now considered by Horticulturists to be as fine as the best that can be produced.
- 11 Because trees and plants must be well rooted if success is to be made with them. Ours are of the best to be had.
- 12 Because our old customers send us repeated orders and their neighbors send us their orders; a proof that they are well pleased.
- 13 Because we use extreme economy in both growing and selling our nursery stock, thereby saving money for you.

**WE CANNOT ACCEPT
ORDERS FOR LESS
THAN \$1.00**

Because of the heavy expense of packing and high rates on first pound by parcel post and express we cannot fill orders for less than \$1.00, without loss to us and will ask you to make your orders amount to \$1.00 and up.

We accept orders subject to stock being unsold when your order comes up for shipment.

Benton County Nursery's TREES, SHRUBS and PLANTS are GUARANTEED TO LIVE. All You Have To Do is Follow the Simple Requirements Below.

We want you to be pleased with your orders you receive from us, we know that is the only way we can expect you to be a satisfied customer. Every plant that you order from this circular is **guaranteed to live**. We will replace free of charge any or all plants you buy that fail to live. We are not asking you to take any risk whatsoever, just give us your order and let us prove to you that we

mean what we say. **All you have to do** is be sure that your order is received on or before **May 15, 1945**, and that you notify us of any plants that fail to live on or before June 1, 1945. All we want is an opportunity to show you that we are proud to have you as a customer and leave the rest to us. We guarantee you will be a satisfied patron.

GREEN POD BUSH BEANS

1,200 to One Beans—A Gigantic Wonder. Over 200 pods have been grown on a single plant—all well filled, producing over 1,200 beans from one bush. Strong, erect plants, bearing pods well up from the ground. Order now as supply is limited.
Pkt. 15c; 7 oz. 40c; 2 1/2 lbs. \$1.25

TENDERGREEN—STRINGLESS

53 days. Plants make a strong, vigorous growth; are well branched and bear a great quantity of beautiful dark green, round, extremely meaty, tender pods, 6 to 7 in. long. Absolutely stringless at all stages of growth; always free from fiber, and of the most delicious flavor. Pods mature early and are borne profusely for a long time. The attractive appearance of the high quality pods makes them ideal for market or canning.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

FULL MEASURE—STRINGLESS

54 days. Medium-early, well-branched round plants bearing a large crop of perfectly stringless, very fleshy, deep green round pods measuring 5 in. in length. Quality is superb and the flavor rich and satisfying. Popular on account of its high yields and long picking season.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

GIANT STRINGLESS GREEN-POD

51 days. The straight, rather slender pods grow 6 in. long; meaty, round, brittle, and absolutely stringless. Somewhat similar to Burpee's Stringless Green-Pod. Seeds are a light brown color. The plants are of strong growth, compact, and bear a heavy crop of pods for a long time.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

BOUNTIFUL STRINGLESS GREEN-POD

48 days. Attractive green pods of the choicest quality; 6 in. long, flat, tender, strictly stringless, and of rich flavor. Matures early. Has proved to be unexcelled on heavy as well as light soils; reliable everywhere. Plants are vigorous, hardy and very prolific, bearing over a flat season. Bountiful is the best of the flat green-pod Bush Beans.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

Improved Golden Wax Beans

Undoubtedly one of the best wax beans for the home garden. Rust-proof, an improvement of the old style Golden Wax. Pod is semi-round, yellow, of good quality, and it has no strings. Ready for picking 47 days from planting.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

POLE BEANS

KENTUCKY WONDER OR OLD HOMESTEAD

65 days. We prefer this to all other green-podded pole beans. It is early, climbs well, and bears a heavy crop of large, green, curved pods, 7 to 9 in. long. They are thick and meaty, tender, brittle, and of good quality, showing slight strings as the pods reach full size. Though thick, they appear slender on account of their great length.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.10

Missouri Wonder

65 days. Round, medium green pods, 6-in. long. Extremely early. Excellent corn hill beans for snaps.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

White Creaseback

68 days. The green pods are 6 in. long, round, deeply creased or saddle-backed, entirely stringless and brittle. The white seeds are fine for baking.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

Be Sure to Order Your Seeds Early as there is a big shortage of most varieties this year.

BEETS

CROSBY'S EGYPTIAN

48 days. An extra-early variety for home and market garden use. Unexcelled for bunching. Roots are smooth, round, with slightly flattened tops; small tap-root. The flesh is very dark blood-red. Tops are medium and the roots deep purplish red. Crisp and tender.
Pkt. 10c; 3 pkts. 25c; 1/4 lb. 70c

DETROIT DARK RED

59 days. An early maturing beet of remarkable uniformity. Splendid for the home garden, market, shipping and canning. Perfectly round and of a deep red color. They reach 2 1/2 to 3 in. in size and have a small collar and a thin tap-root. The flesh is very blood-red, showing hardly any zones. It is tender, fine-grained, exceptionally sweet. Medium size foliage.
Pkt. 10c; 3 pkts. 25c; 1/4 lb. \$1.00

CARROTS

CHANTENAY—LONG TYPE

70 days. A new strain of Chantenay bred to meet the recent popular market demand for longer Carrots. Roots deep orange, smooth, tapered, stump-rooted. The strong, medium tops make it an ideal variety.
Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

DANVERS HALF LONG

75 days. A prime favorite because of its brilliant market appearance. The smooth, handsome roots are 6 1/2 to 7 1/2 inches long, tapering uniformly to a blunt point. Flesh is a deep, bright rich orange color, tender, sweet, and crisp. When bunched it makes the most attractive Carrot on the market, thus always selling at top market prices. Our strain is outstanding.
Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

NEW CORELESS CARROT

A new rapid growing early variety of superior flavor; tender and without any woody heart or core. Roots are half-long, blunt-pointed and grow to a medium size; are very smooth, and of a deep orange-red color. Highly recommended for market or home use when either young or full grown.
Pkt. 15c; 2 pkts. 25c; 1 oz. 50c

SOUP BEANS

The Old Standby for Winter Use GREAT NORTHERN

The Large Flat Soup Bean. A little larger than the Navy Bean but eats every bit as well and is lots easier to pick over. A good yielder and early.
Pkt. 10c; 7 oz. 25c; 14 oz. 40c
2 1/2 lbs. 90c

RED KIDNEY

70 days. As easy to grow as the others. Good yielder of large, dark red, dry beans. Just the thing for baking or for soup.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

Burpee's Improved Bush

The largest of 5 to 6 inches long by 1 1/4 inches wide and in size to those of the large Pole Limas. Pods all Bush Limas, bearing pods almost equal full size beans are of luscious flavor.
Pkt. 15c; 7 oz. 35c; 14 oz. 45c
2 1/2 lbs. \$1.00

CABBAGE

LIGHTNING EXPRESS

The Earliest Cabbage in Cultivation. Our Lightning Express is ready for use in 65 to 70 days from sowing—ten days earlier than Jersey Wakefield. Good fair trials of varieties offered by other such houses as "the earliest grown" have proved that they are from four to ten days later than our Lightning Express.

LIGHTNING EXPRESS is positively the earliest cabbage in cultivation. The heads are pointed, of good size, a little smaller than Jersey Wakefield, always sure to head, solid and firm, and always in demand on the market, bringing high prices on account of their extreme earliness. Very hardy, permitting earliest planting. There are but few outer leaves, and plants may therefore be set closely together. As many as 14,000 heads can be grown on one acre of ground, and will bring a larger profit per acre than later and heavier varieties.
Pkt. 15c; 2 pkts. 25c

CHARLESTON WAKEFIELD

71 days. About a week later than Early Jersey Wakefield, but the conical heads are fully one-half larger, less pointed and usually weigh 4 to 5 pounds. The heads are broad, heart-shaped, 8 inches long, 7 inches broad at base, firm, very solid, and a heavy yielder. Largely used in the South for spring shipping to northern markets and also excellent for the home garden and truckers.
Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

EARLY JERSEY WAKEFIELD

62 days. Our stock is characterized by its distinctive, smooth, blue-green leaves. It has all the elements that count for cold-resistance and unusually early maturity. The small, compact, hard, conical heads are 7 inches long, 5 inches wide at the base, and weigh 2 pounds. Plants small, with short stems, permitting close setting in the row. Suitable for the home and market garden.
Pkt. 10c; 3 pkts. 25c; 1 oz. 40c

COPENHAGEN MARKET

One of the finest early round-headed cabbages in cultivation. It is desirable on account of the remarkable characteristics of maturing the heads all at the same time, enabling the grower to gather his crop with less expense and permitting the cleaning of the land at the first cutting. The heads average about ten pounds each in weight, are hard and solid with small core. The quality is extra fine and sweet. It is a short-stemmed variety, the heads nearly resting on the ground.
Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

See Our Low Prices on Hardy Frost-Proof Cabbage Plants, Page 10

Chinese Celery Cabbage

A most delicious vegetable which combines rich celery flavor with that of the cabbage. Can be cooked or eaten like celery. The mid-ribs can be cooked like asparagus, and, for cold slaw, no cabbage compares with it—one of the most delicious vegetables yet introduced, and bound to become one of the most popular.
Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

GRASOL—The Lazy Man's Spud

Choice Seed Tubers: 6 for 40c; 12 for 70c; 25 for \$1.25; 50 for \$2.25; 100 for \$4.00 postpaid

All stock and poultry like Girasol tubers, but perhaps the most profitable use would be as hog feed, the hogs doing their own harvesting with no expense. Trials along this line have yielded 744 pounds pork gain per acre; this might be considered NET PROFIT. The silage crop would be more than enough to cover cost of seed, land rental and cultivation expenses. Adding grain to balance the ratio would of course help. Every farm should have from one-fourth to one acre of Girasol so that they could turn the hogs on it in the fall. It's a big money-maker for hogs. Girasol may be eaten raw or cooked, but the inulin in Girasol that replaces starch in most other vegetables need not be cooked to bring out its food value. This crop will grow on most any kind of soil but the richer the better of course, but it will do better on poor soil than most any other crop. Single tubers often weigh more than a pound but the average is smaller and more irregular shape than potatoes. Small tubers, or large ones cut small, do not seem to decrease the crop as is the case with potatoes.

WONDERFUL HOG FOOD

If someone were to discover a plant "Sport" or if some plant breeder could cross sunflowers or corn with potatoes to get a plant, the tops of which would make silage and, at the same time, produce valuable tubers that would outyield potatoes two or three to one, under similar soil and moisture conditions, we would hail the result as a wonderful discovery. Girasol will do all this and more and yet, it is just the better of course, but it will do better on poor soil than most any other crop. Girasol alone produced 1,686,030 long tons in 1928 so our Consul at Paris wrote. We call this crop Girasol because the name under which it sometimes passes is the same as another vegetable entirely different which is confusing. The scientific name is Helianthus Tuberosus; it is a native of America, not Jerusalem or elsewhere. Girasol tuber will outyield potatoes two or three to one under similar conditions. Yields of 10 to 20 tons per acre are common. Girasol tops are about a third or a half the diameter of sunflower stalks, but usually two or three feet taller and yield 10 to 22 tons silage per acre. Girasol is not injured by freezing. The whole or a part of the crop of tubers may be harvested in the fall or the spring following. Girasol is propagated by tubers only, not from roots and joints like the quack grass and thistles so it cannot become a serious pest if followed with pasture, hay meadow or good cultivated crops.

Hopi Indian Bean

This Bean has been grown by the Hopi Indians of Northern Arizona from prehistoric times under strictly dry farm conditions and crude farm practices. In trying these out, we find them to be a very fine eating bean. A small crop grown in 1933 and the growers claim that they produced more heavily than any bean we have. They are semi-vining, long rooted, drought-resistant beans, and should be placed in rows 30 to 40 inches apart. They require the full Summer season and should be harvested before frost. They have the true large lima flavor and the Indians claim they are strongly anti-acid, in this being very much different from the usual Navy and Pinto beans and can be eaten with benefit by people who cannot digest most beans. The great productivity of this bean under general climate conditions should make it very popular with gardeners and we suggest that you try out a supply this year.
Pkt. 15c; 7 oz. 40c; 2 1/2 lbs. \$1.20

EDIBLE

SOYBEANS

For Vitamins

Rivals Meat—Not Rationed

Bansei—90 days. An early edible type adapted for production of ripe beans in regions of short seasons but suitable for green shelling. Very productive, not as susceptible to shattering. Pods yellow with black tinge. Plant erect and medium height. Seed medium sized and yellow.
Pkt. 10c; 7 oz. 30c; 14 oz. 45c
2 1/2 lbs. \$1.00

LARGE WHITE POLE LIMA

88 Days. Also known as "King of the Garden." Pods are 6 inches long, broad, flat, and contain 4 or 5 large greenish white Beans of superior quality. Productive over a long season.
Pkt. 15c; 7 oz. 35c; 14 oz. 45c
2 1/2 lbs. \$1.00

The "Frost-Proof" Bean

You Can Plant It Early With the Radishes. 75 days. ENGLISH BEAN. Different and unusual. Plant with your early garden at the same time you plant radishes and onions. Very hardy. Its growing habit between a bush and vine. Shell beans are large and have a distinctive flavor.
Pkt. 15c; 7 oz. 40c; 2 1/2 lbs. \$1.20

Fresh Vegetables FROM YOUR OWN GARDEN Are More Delicious

CUCUMBERS

BOSTON PICKLING—(60 days) An early pickling or slicing variety. Fruits weigh about 1 1/2 lbs., 6 in. long and 2 1/2 in. in diameter.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

STAYGREEN—(60 days) Our strain is the improved long type and is one of the most productive and popular cucumbers in use today. For years it has been a leading shipper and is commonly used in the home and market gardens.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 65c

IMPROVED LONG GREEN—(70 days). One of the best for all purposes—fruits long and slender, seed cavity small. Fruits weigh 2 1/2 lbs., are 12 to 15 in. long and 2 1/2 in. in diameter.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 95c

WEST INDIA GHERKINS

(60 days). A little oval shaped prickly pickle which is said to have come from the West Indies. Very prolific bearer, a stronger grower than most cucumbers, grows anywhere and is practically bug and disease proof. Price:
Pkt. 10c; 3 Pkts. 25c

LETTUCE

Loose Leaved Varieties

BLACK SEEDED SIMPSON—A favorite among the loose leaved kinds, very crisp and tender.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

EARLY CURLED SIMPSON—The best of early varieties of the loose leaved kinds; leaves light green, crisp, and fine flavor.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 75c

HEAD LETTUCE

NEW YORK No. 12 (Or Los Angeles Market)—An improved type, early and sure heading. Is of fine appearance, excellent quality and has a large percentage of perfect heads.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. \$1.00

BIG BOSTON—A variety highly recommended for home gardeners. Sure header medium size, outer leaves attractive green color tinged with brown. Heads are a crisp, fine buttery flavor. Be sure to plant this variety in your home garden.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 85c

SWEET CORN

Cornfume

The Easy-to-apply, Economical Control of Corn Ear Worm

Based on a formula successfully used in tests made by leading Agricultural Specialists. The Cornfume Applicator delivers just the right dose in one application. To be applied on the Corn just before the silks turn brown. One application is sufficient for satisfactory control. CORNFUME is tasteless and odorless. It does not impart any foreign flavor or odor to the corn.

PROTECT YOUR CORN CROP AGAINST THE RAVAGES OF THIS MOST DESTRUCTIVE INSECT.

Remember, Orders for Seed are Postpaid

Grow YOU OWN DILL

70 days. Annual. The young stems are nice for flavoring soups and sauces and are used extensively in a mixed state with lettuce. The dry or green branches and seeds are much prized for flavoring dill pickles.
Pkt. 10c; 3 Pkts. 25c

onions

EBENEZER

The Extra Early, Long Keeping, Mild Onion

One of the mildest flavored onions grown. The flesh is white, firm and of a very delicate flavor. The onions are quite similar to Yellow Globe Danvers in shape but much larger in size, yellow skinned and have very small tops and mature early. Many people who know this onion will have no other kind for their own table. In the localities where it has been grown, the onions of this variety command much higher prices than other kinds. Those who want a nice mild onion, either for large onions or bottom sets, would do well to try the Ebenezer. Sets are grown the same as large onions, except that the seed is sown thickly—one pound of seed to each 100 feet of drill. These sets, if planted early in the spring, will produce ripe onions in July, at which time they will bring a high price. Sets of this variety rarely produce seed stalks as other kinds do. The Ebenezer is such a good keeper that even those ripening in July will keep sound and hard through the fall and all winter. Don't fail to plant some Ebenezer onion seed this season, sowing some for large onions and some for sets.

Pkt. 15c; 2 Pkts. 25c

(110 days.) White Sweet Spanish

Large, mild and sweet. Pure white. A much better keeper than the Bermudas.
Pkt. 15c; 2 Pkts. 25c, Postpaid

For Onion Plants See Page 10

Okra

WHITE VELVET

Strong, tall-growing, 3 1/2 to 4 feet in height. The pods are about 6 to 7 inches long, white, slender, fleshy, and very tender. Early maturing and extensively grown for home use and local markets.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 50c

DWARF LONG GREEN POD

Early and very prolific. Grows 2 1/2 to 3 ft. tall; pods dark green, fleshy and tender; become 7 to 8 inches long and 1 1/2 inches in diameter; tapered near tip.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 50c

Mustard

SOUTHERN CURLED—Leaves large light green finely curled, and have a mild agreeable flavor. It also makes a fine greens for poultry.
Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 60c

Peas

AMERICAN WONDER THE DROUGHT RESISTER

(60 days). Always comes into bearing ahead of the other wrinkled ones. Very dwarf, medium size pods of good quality, unusually productive.
Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

ALASKA

or Earliest of All

(60 days). Standard, popular, extra-early smooth-seeded pea for market and canning. Vines 2 1/2 ft. tall; light green. Well-filled, medium-sized pods completely packed with small round green peas, which turn to peas only all at one time. The pods are plump and round, light green, blunt. The mainstay of the grower who wants a variety than can be cropped in one picking.
Pkt. 10c; 7 oz. 25c; 14 oz. 40c; 2 1/2 lbs. 90c

THOMAS LAXTON

(57 days). This has no superior as an early Pea of medium height. The veins are strong, with large dark green foliage, and grow 2 1/2 to 3 feet tall. They bear a surprising number of dark green pods, blunt-ended, and 4 to 5 inches long. These are well filled with large, tender Peas which retain their pleasing flavor and sweetness until they begin to harden. Unsurpassed for the home-garden and shipping.
Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

LITTLE MARVEL Tender, Heavy Yielder

(62 days). It will be a long time till we find a better one than this. For a healthy, yield, earliness, or any other point, it's hard to beat. A vigorous grower and a heavy yielder. Three quarts of pods will often shell out a quart of peas. Tender and sweet, and of finest quality.
Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. \$1.00

"FOOD WILL WIN THE WAR and WRITE THE PEACE"

MUSKMELON

HALE'S BEST

Most Popular Market Sort

(80 days.) Medium size, very early sort, slightly oblong, but well netted and very attractive. Thick flesh, deep orange color, extensively planted in the commercial muskmelon growing districts.

HEARTS OF GOLD

The Sweet Table Melon

(95 days.) The name about describes it. Medium size, round, well netted, sweet and tender.

Tip Top

96 days. (Salmon Flesh). A large size, main-crop melon, varying in shape from round to slightly oblong. The pale green skin is distinctly ribbed and lightly netted. Flesh is a beautiful deep salmon, sweet, spicy, and full of rich aroma. Popular with home gardeners and in some sections, a leader with market growers.

Honey Dew

110 days. (Green Flesh). The well-known green-fleshed melon for warm climates; will not do well in the north and east. Smooth, ivory colored skin; rich, emerald-green very sweet flesh.

Honey or Sugar Rock

(85 days.) An early variety increasing in popularity among market gardeners and shippers. Fruits 5-6 in. in diameter, round to slightly flattened, coarsely netted, rind strong, deep salmon color.

All varieties, pkt. 10c — 3 pkts. 25c
1/4 lb. 85c

WATERMELONS

Stone Mountain

83 days. Also known as Dixie Belle. A popular round watermelon with grayish green smooth skin and beautiful deep crimson flesh without any white in the heart or stringiness. The average melon weighs about 45 lbs. each. It has a thin rind and is fine for home use and local markets where a nearly round melon is desired.

Winter Watermelon

A home-grown melon for your Thanksgiving dinner. It is not a citron or a freak, but a very prolific, long-keeping true watermelon. Flesh red, extremely firm, very brittle and deliciously sweet. Fruits taken from the field before killing frosts and stored in a cool place will keep long into the late fall and early winter and retain their delicious sweetness and flavor.

Tom Watson

(95 days.) A very large melon weighing 35 to 40 pounds. An excellent shipper. Skin is light green with darker green veins. The flesh is deliciously sweet and juicy.

Kleckley's Sweet or Monte Cristo

One of the earliest, best and sweetest-flavored melons in cultivation. On account of its thin rind, it will not stand shipment to distant markets, but it is the best that can be grown for the home and nearby markets. The skin is dark green. It is of symmetrical oblong shape, well rounded on both ends. The flesh is scarlet, firm, solid and of delightful flavor.

All above varieties.....Pkt. 10c
3 pkts. 25c — 1/4 lb. 75c

POPCORN

AFRICAN GIANT POPCORN

Special Bred Disease-Free Seed Pop Corn

Extra large, smooth grains. Some of them as large as one inch in diameter after popping. Pops with a loud bang. The minute it starts to pop, it sounds like a cannon. Rich, cream-colored grains. Tender and delicious.

Big 7-oz. Package for 30c

Enough to raise all the seed you need for next year.

White Hulless

Kernels translucent waxy white; large and snow white when popped.

Pkt. 10c; 7 oz. 25c

PEPPERS

California Wonder

(122 days) The best large fruited pepper, very smooth, color deep. Meat thick, tender, and of finest flavor. It is fast replacing other varieties. Peppers are about 5 inches in length and 4 in width, being blocky in shape. Rich and glossy green.

Pkt. 10c; 3 pkts. 25c; 1 oz. 75c

Cayenne

(120 days) A very strong variety; fruit is long (about 5 in.) and slender, bright red when ripe.

Pkt. 10c; 3 pkts. 25c; 1 oz. 60c

Perfection Pimento

(125 days) The best of the medium sized smooth sweet peppers, largely used by canners, and excellent for stuffing. Peppers smooth, heart shaped, about 3 in. long.

Pkt. 10c; 3 pkts. 25c; 1 oz. 65c

VINE PEACH

Ripe fruit in 80 days after seed is planted. This wonderful vegetable peach is the most beautiful of all vegetables. They resemble oranges in color, shape and size, and grow on vines like melons. They present a beautiful and tempting appearance when canned and make delicious preserves and pickles; fine for pies. There is nothing like them. Extremely early; of the easiest culture, and very prolific.

Pkt. 10c, 3 Pkts. 25c

Mammoth Prize Watermelon

Mammoth Prize is the largest Watermelon grown. Many grow from 100 to 150 lbs. On 1 vine, 5 melons were grown that weighed 152, 151, 149½, 148¾ and 147 lbs. The five weigh-

ing a total of 748 lbs. The seed we offer is extra select, and should produce fine, sweet, juicy melons of excellent quality and enormous size.

Pkt. 10c 3 pkts. 25c; 1/4 lb. \$1.35

PUMPKIN

Jumbo Pumpkin

Often weighs 100 to 300 lbs. Always a prize winner at exhibitions. A good pie Pumpkin, splendid keeper and valuable for feeding purposes.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 75c

Sweet Potato Pumpkin

Tennessee Sweet Potato is an excellent sort which, when cooked, resembles a sweet potato in flavor, but is of more delicious taste. It is pear-shaped and slightly ribbed. The color is creamy white, sometimes striped with green.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 65c

Sugar or New England Pie Pumpkin

Earliest and best for pies. Fruit commonly 6 in. long and 8-9 in. in diameter. Flesh thick, orange yellow, of unexcelled quality.

Pkt. 10c; 3 pkts. 25c; 1/4 lb. 65c

GROWS PLENTY of... EARLY RADISHES

Scarlet Turnip White-Tipped

25 days. This Radish is a table delicacy, crisp, tender and sweet. A very deep scarlet with a distinct snow-white tip covering about one-third of the lower part. Medium in size, nearly round, with tap-root. We offer a high-class, refined strain.

White Icicle

27 days. Clear white roots which grow to a length of 6 inches, slender and tapering at the tip. Little as ice and of mild, inviting flavor. A fine variety for both market and home gardeners who want an early, long white Radish.

All Varieties
Pkt. 10c; 3 Pkts. 25c;
1/4 lb. 50c

Crimson Giant

28 days. If you desire a Radish of more than two bites, you will find this to your liking. The crimson roots are large, globular, 1 to 1½ inches in diameter. Flesh is grows quickly and remains tender and of white, crisp, and of special quality. It fine flavor to the last. Valuable for home-garden use. The white flesh holds its firmness well. The tops are medium small.

SPINACH

BLOOMSDALE EAVOY—Extra dark green strain. A new, beautiful, best and darker strain. Its glossy green color gives the plants a fresh appearance for a longer time and it is quite early. The leaves are large, fleshy and deeply crumpled. The plants are of upright growth.

Pkt. 10c; 1 oz. 25c; 1/4 lb. 55c

Wonder BUSH CHERRY

These bushes grow about 18 inches high and bear heavy crops of the best flavored fruit you ever tasted. Although many use the fruit raw, all claim it makes better pie than tree cherries. The Wonder Cherry, sometimes called Ground Cherry, will bear eight weeks after planting the seed.

Pkt. 10c; 3 pkts. 25c

SQUASH

Early Prolific Straightneck

New high yielding summer squash. Plants strictly bush and compact. Quality unsurpassed.

Table Queen

(80 days) Sometimes called Acorn because of its shape. One of the most deliciously flavored squashes. If you like squash pie, use this variety. Just the right size to cut in half to serve two. About 6 inches long, shell is thin, hard, dark green. Flesh yellow and very tender.

Giant Summer Crookneck

(58 days) Larger than the above, the golden yellow fruits growing 12 to 14 in. long and 3½ to 4 in. across. Valuable for home or market.

Delicious

(110 days) Has become known for its supreme quality. Produces medium sized, top-shaped, dark green fruits with light green markings. Individual fruits will weigh from 5 to 10 lbs. each. The dry flesh is bright orange, thick, fine grained, and of outstanding flavor. A splendid winter keeper.

All Varieties, pkt. 10c
3 Pkts. 25c; 1/4 lb. 75c

★ **VEGETABLE SPAGHETTI** ★

This delicious new vegetable from Persia thrives in all climates and in any ordinary garden soil. Each plant produces from six to ten beautiful bright yellow, oblong fruits about 8 to 10 inches long. Each fruit is filled with a delicious spaghetti-like pulp. When fully ripe, the whole fruit (without cutting or peeling) should be cooked 20 minutes in boiling water; then cut in half. A dishful of this delicious vegetable spaghetti comes out of each fruit. Season with salt, pepper and butter and serve hot. This remarkable vegetable is one of the most valuable and useful of recent introductions, and should be grown in every garden.

Pkt. 10c; 3 pkts. 25c

GROW YOUR OWN COFFEE

COFFEE — One Cent Per Pound

Grow your own coffee at an expense of less than one cent per pound. The Domestic Coffee Berry makes a delicious, nourishing drink, to take the place of injurious coffee. It is a pure food drink that gives health and strength to young and old. The best coffee substitute ever discovered, and thousands pronounce it as good or better than the best coffee. It has the rich, deep brown color of old Java. One of the easiest grown and most productive of all plants. It is an early variety of soy beans; can be successfully grown in any climate, and is sure to ripen even in the extreme North. As easily grown as corn or beans, and does well on all soils. Thousands suffer untold injury from store coffee. Better grow some of the domestic Coffee Berry this year and save your health and money. Prepared like any other Coffee. Full directions with every packet.

BUY WITH CONFIDENCE

Benton County Nursery's Seeds Are ALWAYS TOP QUALITY!

TOMATOES

EARLIANA

(94 days) Hardy and productive, coming into fruit in the shortest time and rapidly maturing the entire crop of fine fruit. Fruits are globe shaped, somewhat flattened, deep scarlet and smooth.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

Rutgers—The Ideal Tomato

A commercial variety of great importance in most of the Eastern and Southern states. It is suitable for canning, juicing, and for long distance shipping. Large fruit size, 6½ to 7½ ozs., makes it favored over many other popular tomatoes. Globular in shape, slightly flattened, smooth, bright red, and with heavy walls and small cells. Vine is vigorous, heavy, and wilt-resistant to a high degree. It is particularly adapted to light soils and is grown on a large scale in New Jersey and Texas.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

Break O'Day

63 days. Outstanding for its maturity, smooth, uniform, globe-shaped fruits, and resistance to wilt. Plants are large, producing an abundance of medium sized, bright red fruit with thick walls, small seed cavities, and splendid flavor. Best adapted to rich, heavy soils. For home and market.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 65c

Oxheart

86 days. One of the largest tomatoes ever produced, some fruits weighing 2 lbs. each. The skin is purplish scarlet, smooth, and evenly colored. The oxheart shape of the fruits is most distinct, and they are extremely solid, having few seed cells, which accounts for their enormous weight. It is primarily a home garden variety, but purplish salable on local markets and roadside stands. A quality sweet-flavored tomato.

Pkt. 10c; 3 Pkts. 25c; 1 oz. \$1.00

Marglobe

MARGLOBE — (114 days) A leading variety among canners, shippers and market gardeners. The vine is vigorous, resistant to disease, fruit a large, slightly flattened globe of fine bright scarlet color, very firm and meaty and of the very best quality. Fruits weigh 7 to 9 oz.

Pkt. 10c; 3 pkts. 25c; 1 oz. 60c

New Tree Tomato

A wonderful variety that grows upright better than any we have ever seen. Tomato firm, solid, thick flesh, large meaty centers. Fruit is purplish pink. Form always round and symmetrical and of medium size. Very productive.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 80c

SEEDS FOR POULTRYMEN

POULTRY CABBAGE

Is a wonderful green food for poultry and has been known to yield 3 tons in a space 40 by 60 feet. You can't beat this for low priced feed. One-half pound of seed will grow enough greens to feed about 1,000 hens for four months. 3 pounds to an acre for 6,000 hens for four months. Poultry Cabbage is a rapid grower. In the Northern States the seed may be sown any time from early spring until the middle of July. In the South, seed may be sown throughout the entire year.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

May We Suggest

... that you order your seeds and plants early to avoid disappointment. Some varieties are scarce this year. Give us the date you want your plants shipped. In case we are out of some variety you order, and it is not available, we will give you the next best unless otherwise indicated on your order.

GARDEN FOR ICTORY

BE SURE TO PLANT SOME OF THE NEWER VARIETIES THIS YEAR

COLOSSAL

Pkt. 20c — 3 Pkts. 50c

This is a large tomato, being even larger than the famous Ponderosa. Many planters in different parts of the country have grown Colossal Tomatoes weighing over 3 lbs., and some more than 4 lbs. Not only does the Colossal produce giant fruits but it produces them in abundance. One planter in Illinois raised over a ton of Tomatoes from 186 plants. The very thick, meaty flesh, few seeds, and mild flavor combine to give the Colossal a quality on a par with its immense size. Unsurpassed for slicing or canning. Limited Supply.

Tomato Plants will be ready for shipment May 1st. Price list will be sent to you March 1st.

PARSNIP

HOLLOW CROWN — The roots reach a length of 8 to 10 inches. Flesh white, tender and sweet.

Garden Huckleberry

The Garden Huckleberry produces from seed the first year. A new fruit that cannot be excelled for pies and preserves. Very prolific, yielding an immense crop of fruit. It is an annual and must be planted each year from seed. Grows and thrives in all climates and on all kinds of soil. The fruits grow larger than the common Huckleberry or Blueberry. If cooked with apples, lemons, or anything sour, they make the finest jelly. You will be delighted and astonished with this easily grown, wonderful novelty.

Pkt. 10c; 3 Pkts. 25c

Try This New American Drought-Proof Pea

Laughs at Drought, Smiles at Rain. For midsummer planting this is the variety to plant. If it rains and the soil is kept moist, this variety will produce as large a crop as any variety we know of. If it doesn't rain, and it gets hot and dry, you will get a crop anyway. The handsome round pods are well filled with from 7 to 10 peas in a pod; quality excellent, sweet and tender, even when the peas are large. Vines grow 2 feet high, and require no support. This is the pea that will do its best in the North, South, East or West. Don't fail to try it.

Pkt.10c
7 oz.....35c
14 oz.....45c
2½ lbs. \$1.20

Plant SWISS CHARD for Greens

GIANT LUCULLUS. 58 days. The rich green, fleshy, heavily crumpled leaves of this variety make very tasty "greens." The erect plants attain a height of 2 to 2½ feet. Largely sought after by those who prefer the thick, creamy white stems or stalks which are edible and tender, and may be served as a separate dish like asparagus. The leafy part can be cooked like spinach or turnip greens. If desired, the whole leaf can be boiled and served as "greens." There is a delicious, delicate flavor not found in either turnips or kale.

Pkt. 10c; 3 Pkts. 25c

PROSO The WONDER EGG and MEAT PRODUCING Poultry Grain

Here is a new Poultry Grain that owes its origin to Russia, that enables you to raise your own feed. If you only have a small plot of ground, you can make an enormous crop. Proso is unlike anything you have even seen in this country. It grows more rapidly and matures quicker than other grains. It reaches a height of three to four feet, stools and branches making fifteen to twenty-five heads instead of one. That is why it yields such enormous crops from such unbelievably small plots of ground.

Wonder Egg and Meat Producer for Chickens, Ducks and Geese

Proso makes a splendid mash when ground alone. When feeding with corn or oats the ration should be four parts Proso to one other grain. It may be fed in bundles as the kernels are readily scratched out of the heads, or it may be sown up a stout stalk, 3 to 4 feet high, and just loaded with leaves.

Fine for Hogs, Cattle, Sheep, Growers Anywhere. May Be Planted Late.

Although a native of Russia, Proso does better, grows faster and matures quicker in our climate. During the fifteen years since it was first introduced into this country it has become acclimated so that it now grows here just as well as our native crops. It may be planted any time after corn planting time up to the middle of July.

7-oz. pkg. 45c — 2½ lbs. \$1.20 — 5 lbs. (1 acre sowed in drills) \$2.00 — 12½ lbs. (1 acre broadcast) \$4.00 — 25 lbs. \$7.00

Plant the New BOYSENBERRY for Handsome Profits!

Said to be the largest and finest vine berry ever introduced. The Boysenberry is a new variety produced by crossing blackberries, raspberries and Loganberries. The flavor is a very pleasing blend of these varieties. It has few and soft seeds. The plant is very vigorous and hardy, coming through in good condition, without injury, in temperatures as low as 19 below zero. The berries are extremely large, many of the berries getting more than two inches long and over one inch in diameter.

Ea., 12c; 100, \$1.20; 1,000, \$8; 1,000, \$60

For All Climates

Crab Apples are especially desirable in the colder sections as only a few varieties of apples can be successfully grown; but they succeed well in all climates and their fruit is very popular for preserves, jelly, and some sorts are excellent for eating.

FLORENCE

The finest of the Crab Apples. Tree of rather small size, coming into bearing when very young and producing heavily; the fruit setting in clusters. The apples will measure about an inch or slightly more in diameter; golden yellow with a bright cheek, or almost entirely red. The flesh is firm, fine grained and exceedingly juicy with that distinct snapiness so relished in a crab apple.

RED SIBERIAN

Fruit about an inch in diameter, brilliant yellow with an attractive red cheek; very juicy and excellent for jellies, preserves and pickles. The tree becomes of very large size.

DOLGO

A handsome red Crab Apple. Flesh and deep red to the core. The fruit is full of juice, jells easily and makes a rich ruby red jelly of beautiful color and excellent flavor.

MOORE'S EARLY—Very large and early.
WORDEN—Medium early and good flavor.
CARMEN—Smaller than Worden but compact bunches.

White Varieties

NIAGARA—Large and sweet. Heavy bearer.
MUSCADINE CLASS.....50¢ each
SCUPERNONG—Large, white, yellow.
THOMAS—Reddish purple, excellent flavor.
GRAPE VINE SPECIAL—7c each
These are well rooted grape vines (not merely cuttings). They were set out late and did not make large vines this season. They will grow well and make fine vines in one year. We have in this grade: **CONCORD** (only 10 to a customer).

New Variety

Grapes That Will Pay You to Plant
30c ea.; \$3.00 doz.;
\$22.50 per 100
CACO—Fine wine color and highest quality.
PORTLAND—Earliest white grapes. Highest quality.
CYNTHIA—Late black grape. Finest grade of all for red wine.
FREDONIA—Earliest black grape and very large.

Delicious NECTARINES

A most unusually outstanding and delicious plant. A cross between a peach and a plum. Resembles a peach in shape, size and flavor. As fuzzless as a plum. Fruit is large, juicy and melting. Unequaled either as a fresh fruit or for canning. Flesh fine grained and a beautiful color clear to the pit. Destined to become one of America's most popular tree fruits. Has the same habit of growth and bearing as the peach, and requires the same care.

WE OFFER THE THREE MOST POPULAR VARIETIES
SURECROP—Red freestone under-laid with yellow.
PINEAPPLE—Red freestone.
QUETTA—Red clingstone.

ASPARAGUS

50 Plants \$2.75
(Rust Proof) 1 year full growth. Postpaid.
Order Collection No. 6 75c per doz.

Planting Distances of Trees and Plants

	<i>Feet apart</i>	Quince	10 to 12
Apple	25 to 35	Figs	12 to 15
Pear	20 to 25	Mulberry	25 to 30
Cherry	18 to 25	Japan Persimmon	15 to 25
Peach	18 to 25	Pecans	40 to 60
Plums	15 to 20	Grapes	8 to 10
Blackberry, 3 feet apart in row			7
Dewberry, 2 feet apart in row			6
Raspberry, 3 feet in row			7
Strawberries, 2 to 3 feet in rows			4

Number of Trees Per Acre at Different Distances

Rule: Multiply the distance the plants are set apart, in the row, and the product will be the number of square feet for each plant, or hill, which, divided into the number of square feet in an acre (43,560), gives the number of trees or plants per acre.

Distance apart	No. Trees	Distance apart	No. Trees
10 ft. by 10 ft.	435	15 ft. by 17 ft.	150
11 ft. by 11 ft.	360	16 ft. by 18 ft.	134
12 ft. by 12 ft.	302	17 ft. by 19 ft.	120
13 ft. by 13 ft.	257	20 ft. by 20 ft.	108
14 ft. by 14 ft.	222	25 ft. by 25 ft.	69
15 ft. by 15 ft.	193	30 ft. by 30 ft.	48
16 ft. by 16 ft.	170	40 ft. by 40 ft.	27

HONEYSUCKLE SPECIAL

Hall's Honeysuckle (L. Halleana). A strong, vigorous vine with pure white flowers, changing to yellow, foliage remains green well into winter; very fragrant and covered with flowers almost entire season.

HYBRID PERSIMMONS

Some of these should be planted by every family. The fruit often measures ten inches in circumference. They ripen in August, September and October. The trees bear young, and are very ornamental.
EUREKA—Very large, oblong, pointed, flesh yellow, skin red.
HYAKUME—Large round; skin orange red; flesh brown or dark; very sweet.

\$1.00 each

NECTARBERRY

Richest Flavor of All. Heavier Yielding Over a Long Period. Fruits Average Even Larger than Boysenberry.

Attention has been attracted to this berry by its particularly large juice cells or drupelets, larger than those of the unusually large Youngberry, from which the seed came. The flavor carries with it the tang of the raspberry. Very excellent flavor and fruit of unusually fine quality.

15c each \$1.50 per dozen

Everbearing Blackberry

This new everbearing blackberry is one of the latest creations in blackberries. They bear enormous crops for three months, beginning to ripen just after the Early Harvest and continue almost until frost; the berry is very large, of fine quality, melting in your mouth and does not have the large core that is so common in so many kinds of blackberries. The canes are husky growing plants, standing erect, resembling small trees from 6 to 8 feet high and branch heavily. We have only a very few for the market this year.

20c each \$2.00 per doz.

BRAINERD BLACKBERRY

A New Tremendously Heavy Yielding Blackberry for the Central, Southern and Pacific Coast States.

A trailing type much harder and better in all other respects than the Himalaya. Brainerd is extremely productive of very large clusters of high quality berries when fully ripe and which contain relatively smaller seeds than other blackberries of this type. The Department of Agriculture has made numerous tests of this variety and because of its greater hardness and tremendous yields of large, highly-flavored berries has deemed it a very worth-while variety and worthy of introduction.

10c each \$1.00 per doz.

OZARK BERRY SPECIAL

No. 1

- 4 Ozark Huckleberries
- 4 Ozark Gooseberries

OZARK BERRY SPECIAL

No. 2

- 12 Ozark Black Raspberry Plants
- 12 Ozark Gooseberries
- 12 Huckleberries
- 25 Blakemore Strawberries

for \$2.50

RHUBARB (Pie Plant)

GIANT VICTORIA—This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright, crimson color, very tender, crisp and of mild, delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 10 to 24 inches long; broad, thick and solid; stalks will weigh on an average one-half pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money maker and in great demand. Try a dozen or two, our word for it, you will never have cause to regret your purchase, and you will never be without some of this variety.

10c each, \$1.00 per doz.

HAVE GORGEOUS BLOOMING FLOWERS AND A BEAUTIFUL LAWN

Order by Mail in the Convenience of Your Own Home

GIANT ZANZIBAR PALM

Zanzibarensis—Ornamental Foliage Plant
From seed of this variety, sown in the open ground in May, the plants are in full foliage early in July. They attain a height of 12 to 14 feet and form a perfect pyramid of foliage and brilliantly colored fruit, presenting a beautiful tropical appearance. Enormous leaves, 2 to 4 feet across, and highly colored light and dark green, coppery-bronze and dark green with reddish ribs. The plants are a repellent to Moles and the foliage is death to Japanese Beetles and Grasshoppers.

Pkt. 10c; 3 pkts. 25c

MEXICAN FIRE PLANT

(Annual Poinsettia)

A variety of Poinsettia which grows quickly to a height of 2½ to 3 feet from seed sown in the open during May. About the middle of summer, the top central leaves turn to rich orange-red, similar to the famous greenhouse variety of Poinsettia which is so popular about Christmas time. A blaze of glory throughout the summer and fall. Can also be grown as a house plant.

Pkt. 10c; 3 pkts. 25c

SURPRISE GARDEN MIXTURE

Hundreds of varieties of pretty flowers at practically no cost. Unusually or bare spots in the yard, along the fences, on embankments, etc., can be transformed into a delightful, attractive flower garden. This flower seed mixture is especially prepared from a select list of hundreds of sorts—the colors are varieties being carefully proportioned to produce a constant and varied bloom the whole season. In no other manner can so many different varieties be obtained at so small a cost.

Pkt. 15c; 2 pkts. 25c

SHOO-FLY PLANT

It is said that flies will not stay in a room where it is grown if they can conveniently escape. What it is about it that repulses them is not clear, as the plant and flowers have no odor. It is a beautiful flowering plant, and blooms in a short time (60 days) from seed. It is a prostrate bloomer in pots both summer and winter, the blooms being large, cup-shaped and of a lovely light blue color with white center.

Pkt. 10c—3 pkts. 25c

BALSAM PEAR

Ornamental Vine with Edible Fruits

A very ornamental and curious climbing vine with glossy green foliage. Pear-shaped ornamental fruits known to Chinese as La-Kwa, and used extensively in China as a food for human consumption. Usually prepared for the table by boiling the fruits before they are ripe. Give it a trial, both as an ornament and as an addition to your list of edible fruits.

Pkt. 10c; 3 pkts. 25c

MIXED PETUNIAS

This mixture contains a good range of brilliant and impressive colors and these hardy plants retain a continuance of bloom until frost. Their blazing array of color makes any display an object of admiration and beauty when stocked with these vigorous and profuse growers.

Pkt. 10c; 3 pkts. 25c

Ostrich Feather ASTERS

We are now offering improved strain of Giant Ostrich Feather, and consider it the finest of all Asters. The plants are about 2½ feet high, robust in growth, and branch freely, and are loaded with magnificent, feathery, full, fluffy flowers par excellence. Beautiful mixed colors.

Pkt. 15c; 2 pkts. 25c

CACTUS SEEDS

Cactus make most interesting house plants, extremely odd and curious, and many have generous and beautiful blossoms, sweet scented, and blooming profusely. These oddest of all plants grow in many shapes and sizes, are easily grown, thrive and bloom with very little care, and endure the heat and dryness of the ordinary living room. Much pleasure may be derived from growing them from seed. Everyone is delighted and surprised at the odd appearance of a Cactus just sprouting. If you desire a fine collection of rare varieties, sow the seed in pots or boxes in a warm room in moist sand, and the seed will grow quickly. We have fresh seed of a mixture of choice varieties.

Pkt. 10c; 3 pkts. 25c

5 reasons why it pays to fertilize your lawn the NEW, quick E-Z way!

1. "E-Z" TO USE. Simply fill the container with any good commercial fertilizer, push E-Z Fertilizer Spreader like a mop and your lawn is covered. Fertilizer need never touch your hands.
2. SCIENTIFIC UNIFORM. E-Z gives you correct distribution. No portion of your lawn is neglected—none receives excess.
3. QUICK. E-Z's wide container assures complete coverage of entire lawn speedily, efficiently.
4. ECONOMICAL. You use just the exact amount of fertilizer needed—no waste.
5. STRONG. Dependable construction assures long life for your E-Z.

DE LUXE MODEL

Printed in seven different colors. The revolving chart points to A-B-C-D-E-F-G, which denotes the various degrees of acidity, alkalinity or neutrality of the soil. By turning to A which is highly acid you are told which flowers or vegetables will thrive in this soil.
The small bottle contains a sufficient supply of Alkali Soil Testers to make at least 50 tests. This bottle is permanently attached to the chart. To remove the testers, you remove the cord and replace it to keep the testers handy.
Reverse side of Chart contains Soil Indicator listing more common vegetables and flowers and beside each are certain key letters which denote the type of soil each is apt to thrive in.

velvety crimson, cerise red center.

E. G. HILL — Dark red. Profuse
bloomer.

FRANCIS SCOTT KEY — Glowing
scarlet with darker shadings.

PINK VARIETIES

DAME EDITH HELEN — A true
pink with pointed blossoms.

PINK RADIANCE — Large pointed
buds that are rosy-carmine on
the outside of petals and light sil-
very pink on inside. Very beau-
tiful.

EDITOR McFARLAND — A deep
sparkling pink. Upright bushes
which hold the flowers stiffly
erect and make them particularly
suitable for cutting.

EDITH NELLIE PERKINS — The
open blooms on the outside are
bright orange cerise and the in-
side overspread with pale salmon-
pink.

You Pick Bouquets Galore When You Plant Our Hardy Everblooming ROSES

Field Grown

2-year 60c each
size.....\$6.00 doz.

BETTY UPRICHARD — Large
blooms of delicate salmon-pink,
one of the best bloomers.

BRIARCLIFF — A beautiful rose-
pink. Very hardy.

YELLOW VARIETIES

GOLDEN DAWN — Richly fragrant,
pale lemon-yellow flowers of
great size and lasting quality.

MRS. P. S. DU PONT — Golden yel-
low. The plant is very compact
and leafy. Blooms throughout the
season.

LUXEMBOURG — Yellow, shading
to copper at center. Stiff, upright
stems. Valuable for cutting.

WHITE VARIETIES

K. A. VIKTORIA — Well formed
creamy buds, which develop
slowly to snowy white blooms of
perfect form.

CALADONIA — A pure white rose
that is very fragrant.

TWO-TONE VARIETIES

TALISMAN — Brilliant red and
golden buds that open to beau-
tifully shaped blooms of scarlet-
orange, and golden yellow. Will
thrive almost anywhere.

PRESIDENT H. HOOVER —
Large, cerise-pink, flame, scarlet,
and yellow bloom. Broad petals
and fragrant.

BEAUTIFUL CLIMBING ROSES

RED RADIANCE — A vigorous
climber and identical with the
bush Radiance.

TALISMAN — Same shade and
quality as the bush variety.

PAUL'S SCARLET — Scarlet flow-
ers of excellent shape and mod-
erate size, borne in small trusses.
